EXCELLENCE

C2

C2's contemporary look and construction with an updated making technique indeed makes it a present-day chair. The compressed wood shell is bent in 3 axes to achieve the desired ergonomics of the chair, providing extra support to the user. One of the most promising features of this chair is its seat and back, meeting at an angle of 45 degrees. The sides of the chair provide better seating comfort and allow free leg movements. A rectangular metal tube is bent to form the support with a black polyurethane concave armrest, ensuring extra comfort and enhancing the look while maintaining the harmony of the chair design. Another appealing element of this chair is its very grounded flower-shaped revolving metal base.

The C2 family includes a full range of revolving chairs. The high back, medium back and low back chairs provided with or without armrests as required. All the finishes are customisable to meet the client and architect needs.

The C2 non-revolving chair is designed with a cantilevered base frame, available in very comfortable options with and without arms. These chairs can be further customised and developed into a continuous running seater for reception and waiting areas. These are also provided with additional side tables for keeping reading material.

The C2 series also includes some unconventional sofas suitable for exclusive waiting and lounge areas. The distinctive feature of this sofa is a loop of a rectangular flat tube that is bent to form the armrests and the base structure. Customisable in a combination of single, two and three-seaters as per the site situations. Following the same design, we have a centre table; its top can be glass, laminate or veneer.
