Ace

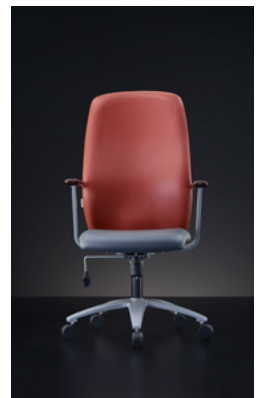

Ace task chair is designed in a harmonic rhythm; it is flowy and expressive and has an organic form. This chair's back and seat are made of moulded polyurethane foam with moulded compressed wood structure giving it the desired shape. The arm is made of a rectangular pipe bent at a certain angle to go with the flow of the back and detailing of a small triangular bracket gives more stability to the armrest. Our very artistic flower-shaped revolving base completes this chair's personality. Ace family of task chairs have a complete set of cushioned, mesh, woven PVC and jute backs available, giving the architect and User a multiple choice to play.

Ace

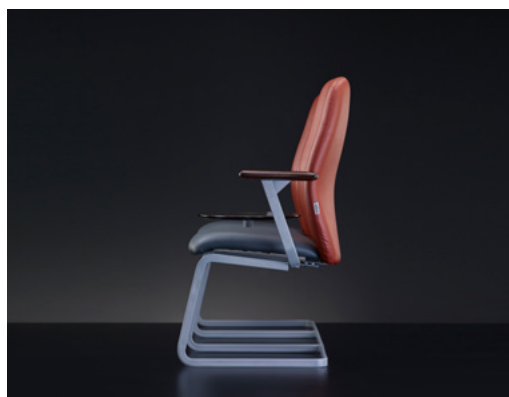

A well-composed contoured back provides extra support to the user for long working hours. The metal armrests structure's design complements the back's style, and the cantilevered wooden handcrafted arms add more character to this chair.

Ace

Ace chairs' highlight is its special non-revolving cantilevered chairs, available in variations of with and without armrests. The cantilevered feature gives the User an added comfort along with a bouncy experience. This unique feature is also available in the continuous Tandem Seating, which can be customised and designed to suit the User.
