

Bio

The Bio Series was designed in the mid-90s following the principles of Bionics by Amber R&D. It is one of the time-tested products and has been a best seller for many years. Inspired by the concept of bio-styling, the organic contours of Bio chairs are designed to support the human body perfectly, achieving a balance of form and function. This form is a construction of the moulded compressed wood structure and polyurethane foam with upholstery of choice. The Bio family has evolved with time, and as per client requirements. The additions are nylon mesh back chairs and weaved PVC/Jute strip back chairs for the contemporary offices.

Bio

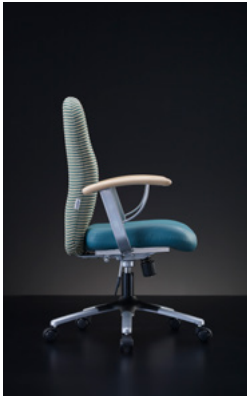

Continuing the concept of Bionics is the design of the Bio armrests. A compressed wood section is handcrafted to achieve the oval shape handles. The armrests are also available in black polyurethane.

Bio

The Bio series includes the cantilevered base non-revolving chairs for the visitors, available in both with and without arms version and a distinctive cantilevered continuous running seating designed in pipe metal frames, customised to the Client needs to complete the waiting areas.
