

Ease

Ease is an excellent dining chair. It is a beautiful and functional design. The curved back made of moulded compressed wood gives the best comfort, while the pipe frame structure makes it look light and slender. Ease has cushioned seats for comfort. Making the back either in laminate, veneer, or cushions is also possible. Ease table is a simple structure; the size can be customised according to the requirements, while there are various options for tabletop like laminate, veneer, glass and stone.

Ease revolving chairs are very compact and comfortable. These chairs work best for home offices and as visitor chairs for agencies, travel companies, jewellery stores, or other counters. Bar stools with footrests are also available without revolving bases. We can also pair these stools with high drafting tables.

Following the same method, we also have Ease tandem seatings. The same tubular pipe is used to make the base. Ease's perfectly curved supporting back makes this chair apt for public waiting areas.
