

Verve

Our very dynamic and characteristic Verve chair has been a favourite of many. The form of this chair is inspired by nature. A perfectly curved Back resembles the petals of a flower. It is designed to hug the human body from all sides. This chair's structure is made of solid metal rods, to which strips of nylon are woven firmly to achieve the desired comfort. To this metal structure, polyurethane foam is handcrafted, forming the Seat and Back. We have developed two types of base for this chair. Two compressed wood components are joined in a criss-cross pattern to create the static chair, and an additional revolving feature to the fixed base is developed by using our Z-shaped wooden members. This multipurpose chair can go well in any space.

Verve

Verve bar stool with footrest is a combination of different materials in the right proportion. The body comprises of a perfectly contoured cushioned Seat and Back. This stool's base is made of a hollow square metal tube, and the legs are made of Z-shaped wooden members. The finishes of all these materials are customisable, and it is most suitable for exclusive lounge and bar areas.

Verve

Verve tandem seating has been one of our best-sellers. We highly recommend these seatings for your offices' reception areas and waiting for lobby areas of hospitals, polyclinics, museums, or any other large public spaces.
