

Verve Jute

Verve jute as the name suggests, is our version of Verve chair with jute woven backrest. To bring in the humble Indianness and natural feel to our products, we have excelled the technique of making jute-woven backs for our chairs over the years. Pattern weaving of jute strands around a pipe metal structure is an entirely handcrafted process. It sometimes takes more than a day to make one of these handmade woven Backs. Encouraging the Indian craftsmanship and bringing it to our everyday office life was the idea behind making Verve Jute. To maintain comfort, the Seats are made in the handcrafted cushion upholstery.

Verve Jute

We have also developed a revolving chair with jute back in the Verve series. A four-legged chair made of conical pipes in stainless steel. It works best for casual meeting rooms. And a bar stool in stainless steel base with the hanging footrest is also available.

Verve Jute

For the exclusive waiting areas, we have jute back chairs in the framework of continuous running seatings. The base of this seating is made of conical stainless steel tubes. A perfect blend of these naturally rich material makes these seatings stand out in any environment.
