

Stead

Stead is a family of stools that has been a best seller for many years. Stead has three different sizes-small, medium and large. Along with the stools, we also have a small chair with a backrest made of compressed wood. These versatile stools adapt to many different settings. Their discreet appearance makes flexible seatings, whether in classrooms, laboratory environments, staff seating, or domestic environments.

Continuous running seating is the new addition to Stead Series. These are very lightweight and requires very little maintenance. The seats are made of moulded compressed wood and are concave in shape. Individual seats are connected to the main structure through these metal branches.
