

Zing

Zing is a unique chair. It looks minimal, and it has the correct components in the proper position to comfort the user. The chair's structure is made of round metal tubes, and the seamless joinery of cushioned Seat and Back to the chair's body is one of its exciting features. Zing is an appropriate chair for exclusive dining areas and private lunchrooms. To match with the chair, we also have a Zing table. The centre framework makes it possible to have the tabletop in any shape, dimension and material.

Zing revolving chairs are very compact and comfortable. These chairs work best for home offices and as visitor chairs for agencies, travel companies, jewellery stores, or other counters. Bar stools with footrests are also available without revolving bases. We can also pair these stools with high drafting tables.

The Peak series includes a folding table, and it works perfectly for multipurpose spaces. It is available with castors for easy movement, and this table can be paired with any revolving chair.

Following the same method, we also have Zing tandem seatings. The same tubular pipe is used to make the base. Zing's perfectly curved supporting back makes this chair apt for public waiting areas.
